

Artwork Cut Lines

[View the S&K Templates Here](#)
[Download Cut Line Swatch \(.ai \)](#)

If your artwork will require cut lines (for items such as decals and stickers) we ask that you place cut lines around the artwork so our printers can accurately cut the items for you. You will need to follow directions below in order to place the cut lines on your art files.

If you wish for S&K to add the cut lines for you, we are able to provide this service for you at an art charge of \$60.00/hr.

Art files required to have :

- The cut line must be on the top layer
 - The line thickness must be 0.25
 - The color of the line must be the swatch attached
 - A bleed of 1/8" is required outside the cut lines
 - Each file must be in its own separate file.
 - Stroke is aligned to the center
-

A few different websites talking about using cut lines:
